

# QUICKGUARD

## STERILE TRITICALE HYBRID

for Stabilizing Disturbed Areas

*A plant species that establishes itself in a previously barren environment, QuickGuard provides solutions for erosion control, allowing growing time for perennial plant establishment.*

*QuickGuard is the GREEN solution!*

- Non-reseeding annual
- Hardy and durable, but not persistent or invasive
- Cold tolerant, able to grow under cool conditions
- Larger root mass and more efficient use of soil nutrients than wheat; holds soil and builds soil organic matter
- Superior tolerance to disease, salt, and drought compared to wheat
- Able to adapt to a wide range of soil and moisture conditions
- In their study of triticale, the National Research Council of the National Academy of Sciences concluded that it performs better than wheat on dry and sandy soils, infertile soils, acid and alkaline soils, cold soils, and mineral deficient and high-boron soils\*
- Large seeded; rapid germination (seed size similar to wheat)
- Adapts to either fall or spring plantings
- Dense fibrous root system
- Drought tolerant
- Most hybrid combinations will have fair to excellent winter survival
- Good tolerance to foliar disease
